Profile

I'm applying for a position as a backend/full-stuck developer. In the work process, I value good code, friendly colleagues and a disciplined routine. I'm looking forward to your response.

Experience

2023 - 2023
Webex Technologies

Back end developer

Worked on a legacy project built on PHP 5.2 (without frameworks), involving a large database migration moved to Laravel 10 while preserving functionality without altering the database structure.

2021 - 2023
EliteDevSquad

Full stack developer

Worked on many projects, Dating site with geolocation integrations, Tools for HR specialists, Program tracker for calculating employee time...
